

Concrete drill bit SDS Plus Quattric II

Steel tip with 4 cutting edges and body with 4 discharge spirals, for maximum performance in concrete with SDS Plus connection.

-
-
-

For punctures conforming to certifications in:

Concrete
Masonry

Also suitable for:

Natural stone

Higher drilling speed and longer drill life thanks to:

- Solid carbide metal tip head.
- Head with reinforced shoulders and bevels of new design.
- Core and toe structure reinforced.
- New design of coils to ensure dust disposal more fast.

Greater precision in the drilling process:

- The tip with four reinforced cutting edges avoids seizing when encountering reinforcement bars in the lime.
- Vibration reduced to a minimum thanks to the carbon cutting element.
- Greater stability thanks to the core and reinforced structure.
- Tip consumption detectors on the head according to PGM certification.
- In compliance with the strictest safety standards: the PGM# marked tips certify precise tolerances on the tip geometry, thus ensuring a perfect calibration of the hole and therefore an excellent seal of the dowels.

Concrete drill bit SDS Plus Quattric II

TECHNICAL DATA

SDS Plus Quattric II bit with 4 cutting edges, 4 exhaust channels and Consumption markers for dowelling tools

Detail: from 8 mm
