

**Absorbs liquids by replacing unapproved products such as sawdust
(Legislative Decree 81/08 on workplace safety)**

Product Description

MIXI *grain* is an extremely fast and effective absorbent capable of absorbing liquids from solid surfaces. MIXI *grain* is composed of "granulated and calcined diatomite" (grain size 0,3-0,7 mm 25-50 mesh). It is a multipurpose absorbent for liquids such as oils, hydrocarbons, solvents, paints, coolants, acid and alkaline chemicals, flammables, car radiator liquids, battery acid, etc. It replaces sawdust commonly used as an absorbent. It can be used as a preventive absorbent or after liquid spillage.

MIXI *grain* complies with current absorbent regulations and meets the guidelines formulated by the German Test Institute (MPA).

Technical features

Oil absorption capacity: 1.4 kg of MIXI *grain* absorbs 1 kg of oil.
Electrolyte absorption capacity for batteries: 0.89 kg of MIXI *grain* absorbs 1 liter of battery electrolyte.

High anti-slip properties.

Non-flammable, fire reaction class = 0 (high resistance to fire).

Chemically inert.

Extremely fast absorption.

Particularly suitable for chemical products.

Suitable for absorbing acids, alkaline chemicals, flammable liquids, oils, and water.

The product is reusable until fully saturated.

Not suitable for absorbing hydrofluoric acid.

Disposal of used product follows regulations for the absorbed liquid.

It is an eco-friendly product, causing no harm to the environment, non-toxic, and non-aggressive.

MIXI *grain* is approved as a Class V absorbent (universal absorbent).

If stored in sealed packaging, it has no expiration date.

Available packages

Item code	Description
GRAIN5	MIXI grain multipurpose granular absorbent in a 5 kg drum.
GRAIN10	MIXI grain multipurpose granular absorbent in 10 kg bag.

In addition to single packages, pallets of:

32 bags or 24 drums or 16 bags and 12 drums

5 kg drum and 10 kg bag of MIXI grain

Barrier to prevent the spread of liquid

Accidentally spilled oil

MIXI grain acts as a barrier to the propagation of spilled oil

MIXI grain absorbs oil
